

What is an exceedance ?

An exceedance is when the monitoring level(s) are above Federal Drinking Water Quality Standards for that contaminate. When a water system has an exceedance the system will issue a public notice (PN) explaining what the health risks are and how to reduce these risks.

(See page 3 of this PDF to view PN)

Following is list of Corrective Action statuses to help explain what ADEQ and/or water system are doing to resolve the issue.

Corrective Action Status	Description
ADEQ Providing Compliance/Technical Assistance	ADEQ is assisting facility with the legal and/or technical requirements in order to be in compliance with state and federal regulations.
ADEQ/Facility Collecting Additional Samples	ADEQ or Facility are collecting additional samples to determine if the exceedance is a recurring event or a single event.
Facility Notified of Potential Deficiencies	ADEQ has informed facility that they have an exceedance of a permit limit or surface water standard (i.e. myDEQ Report and/or Phone call/email)
Facility Notified of Alleged Violations	Facility has received a Notice of Violation or Notice of Opportunity to Correct Deficiencies from ADEQ or delegated authority for exceeding a permit limit or surface water standard.
ADEQ/Facility Agree Upon Path Forward	ADEQ and Facility have entered into a formal agreement which puts them on a path to return to compliance (i.e. Consent Order or Consent Judgment)
Facility Improvement in Process	A structural, treatment, and/or operational improvement is currently being implemented at facility.
Compliance/Technical Assistance Was Unsuccessful	Elevating the issue to ADEQ Leadership and the Water System, to seek additional Compliance/Technical Assistance with the goal help the water system return-to-compliance with state and federal regulations.

Drinking Water | Federal Water Standards Exceedance Report

Data Pull Date: 12/12/2018

Facility: Sun Leisure Estates Utilities Company

County	PWS #	Name	Contaminant	Source	Status
YUMA	AZ0414075	SUN LEISURE ESTATES UTILITIES COMPANY	COMBINED URANIUM	Exceeds Rule Limit	Facility Improvement In Process

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

SUN LEISURE ESTATES WATER COMPANY Has Levels of COMBINED URANIUM Above Drinking Water Standards

Our water system, **Sun Leisure Estates Water Company**, in 4TH quarter 2017, violated a drinking water standard. Although this is not an emergency, as our customers, you have a right to know what happened, what you should do, and what we are doing to correct this situation.

We routinely monitor for the presence of drinking water contaminants. Testing results we received on April through June 2017 show that our system exceeds the standard or maximum contaminant level (MCL), for combined uranium. The standard for combined uranium is 30 ug/L. The average level of arsenic over the fourth quarter of 2017 is 40.2ug/L

What should I do?

You do not need to use an alternative (e.g. bottled) water supply. However, if you have specific health concerns, consult your doctor.

What does this mean?

This is not an immediate risk. If it had been you would have been notified immediately. Some people who drink water containing uranium in excess of the MCL over many years could experience skin damage or problems with circulatory system, and many have an increased risk of getting cancer.

What is being done?

We are monitoring. Point of use filters have been added to each home
